ELECTRIC WARRANTY GROUP

DEALER PROGRAM COMPARISON

New Golf Cart Protection vs. New-Cart Extended Coverage

Two protection options for eligible new carts. The key difference is when EWG coverage begins.

THE KEY DIFFERENCE

New Golf Cart Protection: begins on the vehicle sale date and runs concurrently with applicable manufacturer coverage.

New-Cart Extended Coverage: begins after the applicable manufacturer warranty expires.

New Golf Cart Protection

COVERAGE STARTS

On the vehicle sale date

Runs concurrently with the applicable manufacturer warranty. It may provide covered benefits - including eligible labor - that are not provided by the manufacturer. Coverage is limited to the issued EWG agreement.

Consider when: the customer wants applicable EWG protection and support beginning with the vehicle purchase.

New-Cart Extended Coverage

COVERAGE STARTS

After the manufacturer warranty expires

Adds a separate protection term after applicable manufacturer coverage ends. Confirm the manufacturer's coverage period and the selected EWG term before presenting or enrolling the customer.

Consider when: the customer is relying on manufacturer coverage first and wants protection for a later ownership period.

Support Available Under Either Option

PRIOR AUTHORIZATION

Covered repairs require EWG authorization before work begins.

SERVICE COORDINATION

EWG can help locate an approved repair provider when needed.

TRANSPORT BENEFIT

Up to $100 for qualifying pickup/delivery on an approved covered claim.

Dealer guidance: Confirm vehicle eligibility, manufacturer-warranty timing, the selected EWG term, and the current Dealer Rate Sheet before presenting either option. All coverage, limits, exclusions, deductibles, and claim decisions are governed by the issued agreement.
